

Worry Less about  
the pump  
because **Simpler**  
**Epidurals** are now  
in the **Bag.**

**ONQ<sup>®</sup> E<sup>™</sup>**  
Redefining Recovery<sup>™</sup>

# ON-Q<sup>®</sup> E<sup>™</sup> The Easy Epidural

Traditional epidurals for L&D and Postoperative Analgesia often include the use of complicated electronic pumps. Now with **ON-Q E** you can provide your patients the same continuous epidural infusion with an easy to use disposable pump.

## Electronic-free design means fewer worries...

- No Electronic Programming Errors
- No False Occlusion Alarms
- No Software Changes
- No Free Flows
- No Contaminated Equipment
- No Lost or Broken Pumps

## ON-Q E Simple Epidurals are now in the Bag

- Easy to use
  - No complicated electronics or programming errors
  - Portable
- Convenient and disposable
  - Sterile for every patient
  - Available pre-filled
  - Locking carrying case for tamper resistance
- Variable titration
  - Select-A-Flow rates from 1 to 14 ml/hour
- Unique Design
  - Easily distinguishable from electronic pumps
  - Closed system prevents inadvertent access to epidural space
